## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "at least one first element constituting an intermetallic compound of Al". This claim language is unclear as a compound is a distinct substance formed by chemical union of two or more ingredients and it is not clearly understood how an element can constitute an intermetallic compound.

### ***Reissue Applications***

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

Whenever the scope of the claims is changed by the Applicant, a supplemental declaration is required. See MPEP 1414.01.

In accordance with 37 CFR 1.175(b) (1), a supplemental reissue oath/declaration under 37 CFR 1.175(b) (1) must be received before this reissue application can be allowed.

Art Unit: 2822

Claims 1-21, 23-25, 27-36 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

"Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant."

See MPEP § 1414.01.

MPEP1451 requires a cross reference to each other reissue in every reissue filed on a patent. Accordingly, in this reissue, the specification is required to be amended by inserting the following paragraph on line 1 of the specification:

"More than one reissue application has been filed for the reissue of U.S. Patent No. 6, 6329,275. The reissue applications are the present reissue application S.N. 10/732,888, and reissue applications 11/386,114; 11/386,115; 11/386,116; and 11/386,117 which are continuations of the present reissue application."
